

SCIENCE @ GFS

VISION

We believe that each and every child possesses a love of Science as they marvel at the opportunities they have to interact within the world around them. At GFS, we want to be able to facilitate that passion and draw out the potential of our learners.

STRATEGY

At GFS we will equip our learners with the knowledge and skills needed to be scientifically literate. Learners will be inquisitive, asking questions about the world around them.

SCIENCE CAPITAL

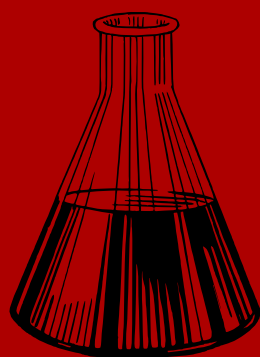

We offer opportunities for the learners to be equipped with the scientific knowledge required to understand the uses and implications of Science, today and for the future.

INVESTIGATIONS

Learners will challenge ideas and seek to find answers through hands on, practical investigations.

WORKING SCIENTIFICALLY

This involves the processes in Science including; observing, identifying, classifying, measuring, testing and recording as well as questioning, predicting and concluding. These skills and processes are embedded into lessons.

EXTRA- CURRICULAR

- Monthly STEM Competitions
- STEM ECA's
- Science Fair
