

Term	Week	Focus	Summary	Learning Outcomes	Learning skills
<b>Term 2.1</b>	1	Topic 5 Business operations 5.1 Economies of scale	• internal (falling average total costs as output increases) • external (falling average total costs due to external factors)	To differentiate between Internal and External economies of scale To apply knowledge and analyse how inefficiencies can occur with large businesses – coordination and control issues.	Creativity- identifying data and creating mindmap and display materials.  Teamwork -Working with other students in a business-based problem-solving/ business strategy exercise.  Interpersonal - Consider the impact of changing technology on large and small businesses in terms of Economies of Scale.  Communication-Able to communicate the business concepts behind a given scenario to peers and teachers and be able to answer questions using business language/terminology
	2	Topic 5 Business operations 5.1 Diseconomies of scale	Economies of scale:  • Diseconomies of scale  limits of growth  Bureaucracy	To apply knowledge and analyse how inefficiencies can occur with large businesses – coordination and control issues.	Critical thinking - Using many pieces of information (sometimes seemingly unrelated) and synthesise this information to make judgements in – students to practice calculations for average total costs.  Interpretation – Analysing how inefficiencies can occur in large businesses
	3	5.2 Production	Production processes:  different types:     o job     o batch     o flow  labour and capital     intensive production	To evaluate the different production methods; To analyse the importance of the different types of production	Analysis - Being able to link business concepts together into logical and cohesive chains that answer a question.  Executive function - Planning how to solve a problem, carrying out the plan and reviewing the outcome.

		the impact of different types of production calculation of productivity and the impact of productivity improvements		
4	Lean Production	Principles of lean production:  • just-in-time (JIT)  • Kaizen the importance of using resources effectively.	Analyse the principles of lean production, just in time and kaizen Evaluate the importance of using resources effectively	<ul> <li>Teamwork -Working with other students in a business and discuss the principles of lean production just-in-time (JIT)</li> <li>Kaizen         the importance of using resources effectively.         Intellectual interest and curiosity         through examining purpose of statement of financial income         Reasoning - Making abstract deductions and draw conclusions         from a variety of information sources.         </li> </ul> <li>Interpretation - Analysing information and understanding the meaning of that information. For instance, interpreting the difference between kaizen and just in time</li>
5	Technology in Production & Half Term assessment	Impact of technology in production:  • use of robotics balancing cost, productivity, quality and flexibility.	To evaluate the importance of balancing cost, productivity, quality and flexibility when using technology To assess the students to check whether assessment objectives are met	Problem-solving - translating a problem in a different context into a process, or series of processes which allows a solution to be determined.  Productivity - Be able to spot opportunities to apply knowledge to questions allowing complex arguments to be

			<u> </u>		
					articulated in coherent, logical chains of reasoning.  Executive function - Planning how to solve a problem, carrying out the plan and reviewing the outcome.
	6	5.3 Factors of production	Changing relationships between enterprise, capital, land, and labour:  difference between capital-intensive and labour-intensive activities.	To evaluate the changing relationships between enterprise, capital, land and labour To analyse the difference between capital-intensive and labour-intensive activities	Creativity Teamwork Interpersonal Communication  • through debating different possible factors of production Case study work looking at the distinction between capital-intensive and labour-intensive activities.  Analysis - Where ever there is scope for candidates to link different ideas together into cohesive chains of argument.  Being able to link business concepts together into logical and cohesive chains that answer a question.
<b>Term 2.2</b>		5.4 Quality	The concept of quality and its importance in:  • the production of goods and the provision of services:  o quality control o total quality management (TQM)  allowing a business to gain a competitive advantage.	To apply the knowledge and analyse the importance of "Total quality Management" To assess how quality can give a business a competitive advantage.	Self-direction - Able to understand the concept of Quality and the benefits of ISO accreditation Perseverance through tackling different exchange rate situations.

		Project: how quality is used by businesses to gain a competitive advantage		
2 and 3	Assessment	Unit 1 & 2 retrieval practice	To be able to answer exam-style questions enhancing the assessment objectives (AO1, AO2, AO3, AO4)	Teamwork Interpersonal Communication  through debating different options for government decisions.  Critical thinking using different information and synthesise this information to make judgements.  Self-direction Initiative- through individual web research.  • Adaptive learning - Making abstract deductions and draw conclusions
4 and 5	Assessment	Unit 3 & 4 retrieval practice	To be able to answer exam-style questions enhancing the assessment objectives (AO1, AO2, AO3, AO4)	Teamwork Interpersonal Communication  through debating different options for government decisions. Critical thinking using different information and synthesise this information to make judgements. Self-direction Initiative- through individual web research.  • Adaptive learning - Making abstract deductions and draw conclusions
